Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

In October 2025, the domestic bond market yields dropped significantly in the last week. Regarding government bonds, the 10-year government bond yield closed below 1.80%, down 7 basis points (BPs) from the end of the previous period. The 1-year government bond yield remained at 1.38%, having risen sharply by 10 BPs in the middle of the month before returning to the previous month's level by the end of October. The yield curve continued to flatten further. Short-term rates rose sharply in the first week. In the second week, amid a slightly eased external environment due to the U.S.-China trade dispute easing, yields across all maturities increased by 2 BPs simultaneously. However, at the end of the period, bond yields dropped significantly against the backdrop of stock market adjustments. During the period, bond issuance volume was relatively high, increasing by 207.77% month-on-month. The central funding rate for October is expected to remain in the 1.5%-1.6% range, with increased volatility in DR007. The central bank injected medium-term liquidity through tools such as the Medium-term Lending Facility (MLF) and outright reverse repos to alleviate the pressure from government bond supply.

Market Outlook and Strategy

Looking ahead to November, as the year-end approaches, the stock market is entering a correction phase. Growth stocks, which had risen significantly earlier, are experiencing pullbacks, while the defensive banking sector is seeing a rebound. In October, the Consumer Price Index (CPI) unexpectedly showed year-on-year growth, but this did not lead to a further increase in bond yields. The performance of the bond market will continue to be significantly influenced by the stock market.

Comments on portfolio

This month, the net asset value (Class I) return of RQFII funds was -0.05%, while the ChinaBond Composite Full Price Index (CBCFPI) posted a monthly return of 0.47%. The fund underperformed the index, primarily due to a decline in equity assets during the month. Although bank-sector convertible bonds rose slightly, they accounted for only 10% of the portfolio and had a limited impact on the fund's monthly return. As of the end of October, the portfolio held approximately 89.95% in bonds, with convertible bonds accounting for 11.16%, remaining unchanged from the previous period. Public mutual funds/equities made up 6.08%, mainly affected by a decline in market value. The majority of corporate bonds held were investment-grade. As of the end of October, the fund's average duration was 1.49 years, with an average yield to maturity of 2.26%. The portfolio included 28 holdings, achieving full diversification.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	-0.11%	0.12%	0.83%	1.44%	-1.85%	-2.12%	0.19%	18.64%
Class I	-0.05%	0.30%	1.18%	2.03%	-0.45%	0.00%	0.66%	25.23%
