

SWS STRATEGIC INVESTMENT FUNDS

Shenyin Wanguo RMB Mainland Investment Fund

 申萬宏源投資管理（亞洲）有限公司
 Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

In November, the spread of the epidemic accelerated in various regions of the country, and the number of infected people reached a new high since March, 2022. The calls for the adjustment of epidemic prevention policies in various places continued to rise. The impact of the epidemic on the economy is also increasingly apparent. In November, PMI lowered to 48, shrank further on the basis of October. At the end of the month, after the meeting of the Political Bureau of the Central Committee, it was requested to further implement the 20 policies, and it is strictly forbidden the measures that violate the 20 policies. After the meeting, local anti-epidemic policies began to undergo significant adjustments. The stock market rebounded significantly, especially in the real estate and consumer sectors related to the post-epidemic era. The bond market fell further.

Market Outlook and Strategy

Looking forward to 2023, China will eventually get out of the shadow of the epidemic and return to normal life. A more optimistic estimate is China will be back to normal after the Spring Festival, and a conservative estimate might be in the second quarter. According to market changes, the portfolio will gradually increase the allocation of stocks and convertible bonds, meanwhile reduce the duration of investment bonds.

Comments on portfolio

In June, our RQFII Fund's NAV (I Class) increased 0.14%, mainly due to the contribution of the performance of equity assets. At the same time, the fund increased its allocation of high-yield real estate bonds, which also provided better returns. As of the end of the month, the fund held about 87.88% of bonds, 2.31% of ETF/equity and 9.81% of cash/currency funds and other assets. As of the end of November, the average duration of the fund increased slightly to 2.61 years, and the average yield to maturity of the fund was 2.39%, a slight increase from the previous period.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	0.11%	-0.51%	0.43%	-0.78%	-0.80%	2.69%	-0.54%	21.00%
Class I	0.14%	-0.43%	0.61%	-0.43%	0.29%	4.51%	-0.22%	25.96%
