

SWS STRATEGIC INVESTMENT FUNDS

Shenyin Wanguo RMB Mainland Investment Fund

 申萬宏源投資管理（亞洲）有限公司
 Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

In August, economic data showed a broad-based recovery. With the summer holiday period and the low base effect, there was an improvement in retail sales growth. Fixed asset investment also saw a slight year-on-year increase, with a particularly significant improvement in manufacturing industry investment. In addition, export declines narrowed, total social financing exceeded expectations, and CPI and PPI increased. However, the economic recovery remains modest, with some weaknesses in the structure. For instance, resident long-term loans in total social financing performed poorly. Real estate development investment continued to be weak, and future recovery remains uncertain. Fortunately, the lowering of interest rates for existing mortgages and down payment ratios this month undoubtedly increases the possibility of industry recovery. Influenced by the proactive policies in this period, the key interest rates for 1/3/5/7/10-year government bonds changed by 9.5bps/-3.5bps/-5.5bps/-8bps/-10bps, causing an overall yield curve shift downwards. The China Bond Composite Full Price Index (CBCFPI) increased by about 0.41% this month, rising from last month's 125.1604 to 125.6781 this month.

Market Outlook and Strategy

Policy implementation has accelerated this month, and all data have bottomed out. However, the slope of the rebound still needs observation. If the pace falls slightly short, there is greater uncertainty about whether further policies to support the economy will be implemented. At this stage, the market is characterized by significant divergence, making it challenging to quickly form a unified direction. Therefore, short-term bonds are currently more suitable for allocation, as long-term government bond yields remain volatile with larger fluctuations.

Comments on portfolio

In August, our RQFII Fund's NAV (I Class) increased by -1.17%, while China bond Composite Full Price Index (CBCFPI) increased by +0.41%, fund NAV underperformed the benchmark. In terms of Fund's asset allocation, our portfolio has 86.01% in bond, 9.18% in public fund/equity and 4.8% in cash/MMF. Most corporate/enterprise bonds are investment grade. By the end of August, the Fund has an average duration of 3.36 years and average yield-to-maturity of 1.41%. The Fund is adequately diversified in 27 names.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	-1.19%	-1.58%	-2.05%	-1.66%	-3.31%	-1.06%	-2.69%	18.11%
Class I	-1.17%	-1.47%	-1.81%	-1.12%	-2.20%	0.77%	-2.27%	23.36%
