

SWS STRATEGIC INVESTMENT FUNDS

Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

In December, the Political Bureau meeting and the Central Economic Work Conference were held, further outlining directions for economic development in the coming year. Policies were highlighted in areas such as "expanding domestic demand," "extraordinary counter-cyclical regulation," "stabilizing the real estate and stock markets," and consumer welfare. Regarding economic targets for next year, after stating the goal of "maintaining stable economic growth," the meetings emphasized the need to "ensure stability in employment and overall price levels," pointing out the importance of "goal-oriented guidance to achieve an optimized combination of steady growth, stable employment, and a reasonable recovery in prices." On the monetary policy front, it was proposed to maintain "appropriate easing." Following the economic work meeting, the stock market performed generally, while the bond market saw a significant surge. The yields on Chinese government bonds across various maturities declined sharply, with the 1, 3, 5, 7, and 10-year yields falling by 29 basis points, 23 basis points, 24 basis points, 29 basis points, and 34 basis points, respectively.

Market Outlook and Strategy

Despite market expectations for a possible reserve requirement ratio cut or interest rate reduction in December, these expectations did not materialize. Nonetheless, the bond market still experienced a significant increase, which may reflect a rather pessimistic outlook on economic growth prospects in the absence of effective economic stimulus. However, we believe that the decision-makers still hold high expectations for economic growth in the coming year and will take appropriate stimulus measures at the right time. Therefore, there should be neither excessive anticipation of strong stimulus policies nor an overly pessimistic view of the economic situation. The current market response seems to be more influenced by short-term sentiments, which may have exceeded what the actual situation reflects.

Comments on portfolio

This month, the net asset value (Class I) return of the RQFII fund was 0.91%, while the ChinaBond Comprehensive Full Price Index (CBCFPI) rose significantly by 1.54% for the month. The fund underperformed the index mainly due to its shorter duration and weaker performance in the equity portion. As of the end of December, the portfolio held approximately 94.05% in bonds, of which 32.22% were convertible bonds, and 3.72% in mutual funds/equities, slightly lower than the previous period. Most of the corporate bonds held were investment-grade. As of the end of October, the fund's average duration was 1.63 years, with an average yield to maturity of 1.39%. The portfolio comprised 33 holdings, achieving full diversification.

	Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A		0.85%	1.58%	1.52%	2.29%	-2.62%	-3.25%	2.29%	18.47%
Class I		0.91%	1.76%	2.43%	3.00%	-1.29%	-1.20%	3.00%	24.61%
