Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
 Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

During this period, the valuation yields of Treasury bonds maintained a range-bound oscillation, decreasing by 10bps/14bps/11bps/15bps/9bps throughout the month. The yield curve further steepened, and bond prices remained high. From a macroeconomic perspective, the total retail sales of consumer goods in May increased by 3.7% year-on-year, an acceleration of 1.4 percentage points from the previous month; month-on-month growth was 0.51%, the highest single-month growth rate since the beginning of the year. Fixed asset investment from January to May grew by 4.0% year-on-year (compared to +4.2% from January to April), and in May, it decreased by 0.04% month-on-month (compared to -0.29% in April). Manufacturing investment showed resilience, but real estate investment and sales remained weak, dragging down the overall pace of economic recovery.

Market Outlook and Strategy

The economic data for May remains sluggish, indicating that signs of economic stabilization are still not solid. To reduce the long-term risks in the bond market, the central bank issued a statement that it would conduct reverse repo operations with primary dealers for government bonds, causing bond yields to fall accordingly, with the 10-year government bond yield rising to around 2.30%. The Federal Reserve's interest rate meeting in June 2024 met expectations and did not cut interest rates, but it revised up the inflation forecast for the United States. At the same time, the dot plot reduced the number of rate cuts expected within the year from three to one, and the long-term policy rate expectations were also revised up, conveying a relatively hawkish signal. However, the May CPI data released before this meeting continued to cool down, and the market expected the Fed to be able to make the first rate cut in September.

Comments on portfolio

This month, the net asset value (Class I) return of the RQFII fund was -0.25%, while the return of the China Bond Composite Full Price Index (CBCFPI) was 0.65%, slightly underperforming the index. This was mainly due to the shorter duration of the portfolio and the decline in equity asset values caused by the retreat in stock market prices. In terms of the fund's asset allocation, the investment portfolio holds approximately 96.15% in bonds, with convertible bonds accounting for 31.21%, and 1.90% in public funds/equities, which has been slightly reduced. Most of the corporate/enterprise bonds are investment-grade. As of the end of June, the fund's average duration was 1.36 years, with an average yield to maturity of 1.74%. The fund holds a total of 27 targets, which has been sufficiently diversified.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	-0.28%	-0.05%	0.16%	-3.60%	-4.06%	-4.30%	0.16%	16.70%
Class I	-0.25%	-0.75%	-3.56%	-2.96%	-2.85%	-2.38%	0.42%	22.39%
