Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Fund Manager

Shenwan Hongyuan Asset Management (Asia) Limited

Market Review

Manufacturing PMI for March declined compared to the previous month, but supply and demand remained in a recovery trend. TSF remained robust with a recovery in loans to households, which consistent with the recover of the real estate market. CPI was below expectation due to nearly one year slowdown in household credit growth in 2022. However, given recent trend, there is a likelihood of CPI rebounding later this year. PPI has remained at a low level, reflecting reduced credit-driven investment. The divergence between M1 and M2 money supplies has continued, also indicating a low willingness of corporate investment. PBOC announced an unexpected 25 basis points RRR, aimed at further supporting economic recovery. As a result, 1/3/5/7/10 year tenor key rate treasury YTM's changed by -9.6bps/-6.5bps/-5.4bps/-3.7bps/-4.9bps respectively. A downward shifting yield curve is observed. The China bond Composite Full Price Index (CBCFPI) closed at 123.78 in February from 123.38 in January, an increase of 0.28%.

Market Outlook and Strategy

Looking ahead, the possibility of continued easing in the short term after the implementation of the RRR cut may be small, but there is still motivation to maintain liquidity this year to support economic recovery. Under the trend of household credit rebound, it's worth paying attention to whether the real estate market, especially the new housing market, will show significant signs of recovery. Infrastructure, consumption, and emerging industries will remain the main areas of focus for development. As economic data gradually confirm, there may be slight pressure on bond prices, so the duration of portfolio assets will be moderately controlled. However, with weak external demand and a long road to repair household balance sheets, the pace of recovery is expected to remain conservative, and there will be limited upward pressure on yields. Due to the uncertain pace of economic recovery, bond market is a good place for stable asset allocation.

Comments on portfolio

In March, our RQFII Fund's NAV (I Class) increased by +0.30%, while China bond Composite Full Price Index (CBCFPI) increased by +0.28%, fund NAV outperformed the benchmark. In terms of Fund's asset allocation, our portfolio has 82.21% in bond, 7.51% in public fund/equity and 10.28% in cash/MMF. Most corporate/enterprise bonds are investment grade. By the end of February, the Fund has an average duration of 2.58 years and average yield-to-maturity of 2.16%. The Fund is adequately diversified in 38 names.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	0.25%	0.24%	-0.12%	0.36%	-1.82%	1.99%	0.24%	20.89%
Class I	0.30%	0.35%	0.07%	0.74%	-0.74%	3.83%	0.35%	26.01%
