

SWS STRATEGIC INVESTMENT FUNDS

Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

The data released after the holiday period has been better than expected. In February, the year-on-year Consumer Price Index (CPI) increased by 0.7%, surpassing market expectations of a 0.3% increase. For the first two months, exports grew by 7.1% year-on-year, exceeding the market's expected growth of 3.9%, while imports increased by 3.5% year-on-year, outperforming the market's anticipated decline of 0.7%. In March, the official Manufacturing Purchasing Managers' Index (PMI) stood at 50.8%, rising by 1.7 percentage points compared to the previous month, returning to the expansionary zone and surpassing the expected 50.1. Additionally, the Caixin China PMI recorded 51.1, a slight increase of 0.2 percentage points from the previous month's 50.9, indicating continuous improvement in manufacturing sector sentiment for five consecutive months and the most significant growth in 13 months, also surpassing the expected 51.0.

Market Outlook and Strategy

The bond market continues to trade with a focus on stimulus measures to boost the economy. In March, government bond yields continued to move downward, with the current ten-year yield reaching a historically low level of 2.3%, which is 20 basis points below the MLF (Medium-term Lending Facility) rate. The persistently declining bond yields indicate market expectations of additional diversified easing policies being implemented. As for the PSL (Pledged Supplementary Lending) program, there was no net increase in February and March. However, various regions have been gradually releasing whitelists, indicating that PSL will be gradually injected.

Comments on portfolio

In March, our RQFII Fund's NAV (I Class) changed by -0.07%, while China bond Composite Full Price Index (CBCFPI) changed by -0.07%, fund performing inline with the benchmark. In terms of Fund's asset allocation, our portfolio has 87.42% in bond, 2.55% in public funds/equities, slightly increased allocation to equity assets, and 10.02% in cash/MMF. Most corporate/enterprise bonds are investment grade. By the end of March, the Fund has an average duration of 1.37 years and average yield-to-maturity of 1.78%. The Fund is adequately diversified in 24 names.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	-0.11%	0.21%	-0.66%	-3.42%	-3.19%	-4.01%	0.21%	16.75%
Class I	-0.07%	-0.75%	-3.56%	-2.96%	-2.00%	-2.13%	0.34%	22.29%
