

SWS STRATEGIC INVESTMENT FUNDS

Shenyin Wanguo RMB Mainland Investment Fund

申萬宏源投資管理（亞洲）有限公司
Shenwan Hongyuan Asset Management (Asia) Limited

The Product

The Shenyin Wanguo RMB Mainland Investment Fund (the "Sub-Fund") invests primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Fund Manager.

Risk Disclosure

- The investments of the Sub-Fund are concentrated on securities related to the PRC market. Investment in the PRC market is exposed to various emerging market risks including political, economic, regulatory, legal, foreign exchange, settlement and liquidity risks.
- The Sub-Fund invests in securities through a RQFII which is subject to applicable rules and regulations imposed by the PRC authorities. The RQFII rules are novel in nature, and their application may depend on the interpretation of the Chinese authorities. Any changes to the relevant rules may have an adverse impact on the investment of investors in the Sub-Fund.
- Renminbi is currently not freely convertible and is subject to exchange controls by the Chinese government. Investors may be adversely affected by the movement of the exchange rates between Renminbi and other currencies.
- The Sub-Fund may be exposed to risks associated with changes in PRC tax laws. Such changes may have retrospective effect and may adversely affect the Sub-Fund.
- Investment in the Sub-Fund is exposed to interest rate risk that applies to debt securities. The macro-economic policies and controls of the Chinese government will have significant influence over the capital markets in the Mainland China.
- The Sub-Fund is exposed to credit risk arising from issuers of the RMB denominated debt securities in which it invests. Such securities are typically unsecured debt obligations and are not supported by collateral. The Sub-Fund is therefore fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.
- Investment grade securities invested by the Sub-Fund may be subject to the risk of being downgraded to below investment grade securities. The Manager may or may not dispose of the securities being downgraded. If the Sub-Fund continues to hold such securities, it will be exposed to additional risk of loss.
- The RMB denominated debt securities market is at a developing stage and the trading volume may be lower than those of more developed markets. The Sub-Fund may invest in debt securities which are not listed. Even if the debt securities are listed, the market for such securities may be inactive. The Sub-Fund may suffer losses in trading such instruments.
- Some of the RMB denominated debt securities invested by the Sub-Fund may be unrated or below investment grade. Such debt securities are exposed to greater risk because of generally lower credit worthiness and liquidity, greater fluctuation in value and higher chance of default than investment grade bonds.
- Valuation of the investments of the Sub-Fund may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations are proved to be incorrect, the Net Asset Value of the Sub-Fund may be adversely affected.
- Distributions of the Sub-Fund may be paid from income and/or capital of the Sub-Fund. The Sub-Fund or the Fund Manager may at its discretion pay dividend out of capital of the Sub-Fund. The payment of dividends out of capital represents and amounts to a return or withdrawal of part of original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital may result in an immediate reduction of the Net Asset Value per Unit. The Sub-Fund or the Fund Manager may amend the Sub-Fund's distribution policy with respect to payment of dividend out of the capital of the Sub-Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Fund Manager upon request and on the website of the Fund Manager at <http://www.swhyhk.com>. Please note that the aforesaid website has not been reviewed by the Securities and Futures Commission of Hong Kong.

Fund Objective: The Sub-Fund aims at providing medium to long-term capital appreciation by investing primarily in RMB-denominated and settled debt securities issued in the PRC through a RQFII quota of the RQFII Holder which is a holding company of the Manager.

Market Review

In November, the market was influenced by several major events. The U.S. presidential election concluded with Donald Trump winning by a significant margin. As expected, the Federal Reserve cut interest rates by 25bps during its November meeting. However, after Trump's victory, market expectations for further rate cuts by the Fed diminished, and the likelihood of a rate cut in December dropped significantly, while the U.S. Dollar Index surged. China's National People's Congress Standing Committee approved an additional 6 trillion yuan quota for local government bonds to replace implicit debts. The market is now looking forward to the December Politburo meeting and next year's Two Sessions (National People's Congress and Chinese People's Political Consultative Conference) for the potential introduction of more policies to stimulate the economy. Over the month, the yield on Chinese government bonds fell by 6bps, 17bps, 14bps, 15bps, and 13bps for the 1-year, 3-year, 5-year, 7-year, and 10-year maturities, respectively, with the 10-year government bond yield dropping below 2%.

Market Outlook and Strategy

In November, the Standing Committee of the National People's Congress approved a quota for new local government debt to replace implicit local debts and also reduced deed taxes on real estate transactions. However, the market did not see significant direct stimulus policies targeting consumption and employment as anticipated. Additionally, influenced by a strong U.S. dollar externally, the RMB exchange rate weakened to as low as 7.3. The capital markets were relatively volatile throughout the month, with Hong Kong stocks continuing to decline. We believe that the Central Economic Work Conference in December may introduce more policies aimed at laying out plans for next year's economic growth.

Comments on portfolio

This month, the net asset value (Class I) return of the RQFII fund was 0.45%, while the ChinaBond Comprehensive Full Price Index (CBCFPI) rose significantly by 0.70% for the month. The fund underperformed the index mainly due to its shorter duration and weaker performance in the equity portion. As of the end of November, the portfolio held approximately 94.09% in bonds, of which 32.03% were convertible bonds, and 2.48% in mutual funds/equities, slightly lower than the previous period. Most of the corporate bonds held were investment-grade. As of the end of October, the fund's average duration was 1.63 years, with an average yield to maturity of 1.38%. The portfolio comprised 33 holdings, achieving full diversification.

Cumulative Return (Footnote 1 & Footnote 2)	1 month	3 months	6 months	1 year	3 years	5 years	YTD	Since Launch
Class A	0.39%	2.10%	0.61%	1.32%	-3.45%	-3.48%	1.43%	17.73%
Class I	0.45%	2.28%	1.17%	1.87%	-2.16%	-1.45%	2.08%	23.76%
