

進行買賣 (Enter Order)

輸入交易指示視窗 (Enter Order Window)

交易指示可以手動輸入或通過點擊報價視窗中的市場報價及交易量來輸入。（注意：在點擊報價和交易量時，市場可以隨時變更。）

This window is used for sending orders. The Order can either be manually entered or selected by clicking at a prevailing market price or quantity in the Price Information window (the Price & Qty field will also be automatically filled in with the prevailing market price and quantity at the time of clicking).

戶口資料視窗 (Account Info Window)

買賣指示 - 上部分是用來顯示所有未成交的買賣指示。在這裏你可以隨時處理這些買賣指示，例如：刪除指示，更改指示等。買賣指示的狀況是即時更新的，當買賣指示已經成交，買賣指示將會轉往視窗的下半部的戶口成交。

Order Book - Upper part of this window is used for displaying and working with orders. It manages the orders in the order book, such as delete order, change order, etc. This window is dynamically updated upon changes of the orders. When an order is fully traded, the order will disappear from upper portion and move to lower portion.
